

## Cappadocia Microlight Flight

### □□

- 15, 30 or 60-minute flight options with different route depths and viewpoints
- Fly very close to fairy chimneys and valleys at low altitude for a much more immersive view
- Open-air microlight experience with panoramic views over Göreme, Çavuşin, and surrounding landscapes

### □□

A completely different way to see Cappadocia from the sky, this microlight flight offers a closer and more dynamic aerial experience compared to traditional balloon tours. Thanks to its low-altitude flying capability, you will glide directly over fairy chimneys, valleys, and rock formations, feeling fully connected to the landscape.

Flight durations are available as 15, 30, and 60 minutes, allowing you to choose between a short scenic ride or a more extended exploration of the region. Longer flights cover wider areas and provide a deeper visual experience of Cappadocia's unique geography.

Flights can take place at sunrise or throughout the day depending on availability and weather conditions. Each flight is operated by a professional pilot, ensuring both safety and comfort while you enjoy uninterrupted panoramic views.

This experience is ideal for travelers looking for a more intimate, closer, and flexible alternative to hot air balloon flights.

### □□

- Hotel pickup and drop-off
- Microlight flight (15, 30 or 60 minutes)
- Professional licensed pilot
- Safety equipment
- Pre-flight briefing

### □□□
