

Turkish Hammam Istanbul

□□

- A traditional Turkish hammam ritual with scrub and foam massage in a clean and modern spa
- Flexible options including hammam, oil massage, or combined packages
- Access to pool and sauna for 40 minutes in a luxury hotel environment

□□

The Turkish Hammam Istanbul experience takes place in a luxury hotel spa, offering a refined version of the traditional Turkish bath with modern comfort and high hygiene standards.

Unlike traditional public hammams, this experience is organized in a controlled and limited-capacity environment, where only a certain number of guests are accepted during each session. After every guest, the hammam areas are carefully cleaned and prepared again, ensuring a fresh and hygienic experience throughout the day.

The session begins in a heated marble hammam area, followed by a traditional kese scrub and foam massage, designed to deeply cleanse the skin and relax the body.

All treatments are performed by professional female therapists, mainly Asian female specialists, known for their consistent technique and attention to detail. This makes the experience especially comfortable for guests who prefer female staff.

Guests can choose between different options depending on their preference. You may select a hammam-only session, an oil massage session, or the most popular choice, a combined hammam and oil massage package for a complete relaxation experience.

In addition, guests can use the pool and sauna for 40 minutes, allowing extra time to relax before or after the treatment.

For couples, a private room option is available, where the entire experience can be enjoyed in a more private and comfortable setting.

The exact location and full details will be shared after booking via WhatsApp and e-mail. If preferred, guests may also come to our office 30 minutes before their appointment, and our team can accompany them to the hammam location within a short walking distance.
